VERMEIREN has designed active wheelchairs to be an extension of your body. Ideal for people with good upper body strength and core stability. Colorful, bright, with a wide range of options to customize your active wheelchair. Depending on your needs, we can provide you with a wheelchair that perfectly fits your active lifestyle.

V500 ACTIVE \ LIGHTWEIGHT ACTIVE WHEELCHAIR

V500 Active

PERSONALIZATION

Introducing the V500 Active wheelchair, built upon the successful concept of the V500 family. This cutting-edge model brings a plethora of options and accessories, catering to diverse needs, including the most advanced requirements. Designed for ultimate user personalization, the V500 Active offers high configurability, ensuring a perfect fit for every individual.

LIGHT - FROM 11,9 KG

Through our efforts, we have successfully crafted an exceptionally lightweight model, weighing in at an impressive 11.9 kg. This remarkable outcome showcases our commitment to innovation and delivering a wheelchair that not only looks dynamic but also offers enhanced mobility and ease of use.

FUSION

Embracing an active and modern aesthetic, it appeals to those who seek a stylish and dynamic appearance. Experience the ideal fusion of comfort and adaptability found in a standard wheelchair, seamlessly combined with the sleekness and agility of an active folding chair. The V500 Active strikes the perfect balance, offering an unparalleled mobility solution that empowers users in their daily activities.

Eclips X4

MULTI ADJUSTABLE MANUAL WHEELCHAIR

C25 black | C29 grey | C33 red

- Adjustment of the seat depth
- Aluminum, height adjustable forks to keep the wheelchairs weight minimal
- Foldable footplates
- Rear wheels with Quick-release system
- Backrest adjustable in height

Eclips X4 is a VERMEIREN classic wheelchair that has proven its quality throughout history. It is a light aluminum wheelchair with a multi-adjustable frame. The seat is adjustable in depth, has a reinforced cross for extra strength and Quick-release rear wheels that will provide a speedy disassembly when placing the wheelchair into a car.

The footrests can be folded both inward and outward and can be removed to limit the weight of the heaviest part.

Features

Extra long and padded armrests

Depth adjustable frame

Height adjustable frontwheels and aluminium forks

Tipping piece at the rear to overcome obstacles

Folded width	300 mm
Seat width	390 / 420 / 440 /460 / 480 / 500 / 550 mm
Armrest height	220 mm

Seat height	390 - 520 mm
Backrest height	420 - 460 mm
Seat depth	420 - 500 mm
Weight	17 kg
Maximum user weight	150 kg
Additional information	CE

Measurements in mm and kg. Deviations in sizes and weight (15 mm and 1,5 kg) are possible. Subject to technical alterations. Images for illustration purposes only. Certain features may be optional.

Eclips X4 90°

MULTI ADJUSTABLE MANUAL WHEELCHAIR 90° RECLINABLE BACKREST

C29 grey

- Height adjustable handles
- Inclination of the back by hydraulic springs for more comfort during the tilting
- Internal and external collapsible footplates
- Foldable and removable armrests
- Rear wheels with Quickrelease system

The knowledge and expertise we used to create the Eclips X4 lead to the birth of the Eclips X4 90°. Position changes throughout the day are beneficial for blood flow, pressure relief or even just for comfort. With identical features to Eclips X4, Eclips X4 90° offers the additional option of fully reclining the backrest. Add the optional B14 backrest extension and the BZ7 legrests to create maximum comfort and space to lay down. The position of the rear wheel has been shifted to the back to keep the wheelchair in perfect balance and provide safety when the user is laying flat.

Features

Different adjustment possibilities for the seat height and seat depth

Removable pushbar for a better stability

Quick-release wheels for rapid disassembly Tipping piece at the rear

Adjustment of the backrest by means of gas spring for a smooth adjustment

Searching for a powered wheelchair for indoor, outdoor or compact use?

VERMEIREN has a wide range of powered wheelchairs that will meet the needs of their users. Each powered wheelchair is made to order and can be equipped with dozens of options or accessories. Not enough? On top of that our team can also offer a special manufactured version totally adapted to the user of the chair.

Verso \ LIGHTWEIGHT ADAPTABLE POWERED WHEELCHAIR

Verso

EASY TO USE

Simple, yet perfect. Verso has it all. Disassemble your wheelchair in a few seconds. All parts are easy to carry and not too heavy for easy transport in a car. Assembly is easy with our Click&Drive system.

No tools needed, just connect your battery and you're ready to drive! Thanks to our removable battery, you can charge your chair whenever and wherever you like.

BATTERY & MOTORS

The battery (available in 12,8 Ah or 17,5 Ah) is conveniently located at the back of your wheelchair for easy access when you need to remove it for charging or to quickly check your battery status. Easily unlock your battery with your own anti-theft key to charge it anywhere you like. With 2 x 200W motors and 12"PU black tires, Verso is competing with others in its category. A great and durable choice for a powered wheelchair for everyday use.

EASY TO TRAVEL

A unique feature for Verso is the detachable motor and battery block. Detach your wheelchair from its battery and wheel block to allow for easy storage and transport. Both the frame and the "powered part" of Verso have an additional wheel to make sure no parts can be damaged by detaching. They also allow for easy manoeuvring. The seat can easily be folded like you would any of our other top-selling manual wheelchairs. Perfect for transport in the boot of the car or storage in your home.

Verso

LIGHTWEIGHT ADAPTABLE POWERED WHEELCHAIR

C76 white frame | C77 black frame | C53G glossy orange | C79 glossy blue | C85G glossy green

Colours are a personal experience, just like your Verso. Choose the colour combination that suits your style the best. Select your frame colour between glossy white and glossy black and play with colour accents to make it your style.

SCAN the QR code and enjoy the Verso movie.

Verso is versatile and agile powered wheelchair. Its lightweight design makes it a perfect wheelchair for users on the move who would like to extend their mobility without compromising on comfort.

Thanks to our extensive expertise in options, Verso offers its user a remarkable adaptability to its user. Crafted by merging the durability of a manual wheelchair frame with the advanced features of two motorized rear wheels, Verso is a perfect choice for a comfortable, lightweight powered wheelchair. The lithium battery can be removed for easy charging to enhance convenience in your daily use.

With a sleek design and fun colour accents, Verso can be adapted to your preferences whilst having a modern and attractive look. The colour accents serve a double purpose as they allow you to easily locate the levers of the powered part.

Features

Highly configurable with a variety of options.

Removable motor unit from the seating frame. Removable lithium battery equipped with safety lock.

Two in one. Convert your Verso into a MANUAL WHEELCHAIR. Verso offers a quite unique option for people who are in need of both a manual and powered wheelchair. With our 24" wheel kit you can easily change between manual or powered driving. Plug and drive!

In just a few steps, Plego transforms into a compact and easy to store wheelchair. The complete tool free system can be folded by a single person without any strain or without the hassle of removing the battery.

Ready for a day out? Check your battery status easily whilst seated thanks to our battery status indicator located underneath your seat. The Lithium-ion battery can be locked safely with an anti-theft key or charged separately from your chair. No need to bring your entire chair closer to the outlet. Just take your battery and charge it wherever is most convenient. It is important to note that Plego is approved for air transport according to IATA standards.*

To ease your mind about the driving range or your battery charge, extend your battery life with an additional battery (12,8Ah or 17,5Ah) that can easily be stored underneath your seat with the additional storage bag.

**Please consult our manual for the latest information.*

Plego

FOLDABLE LIGHTWEIGHT POWERED WHEELCHAIR

C4G glossy red | C52 turquoise | C56G metallic blue

C77 glossy black | C87G glossy melon | C88G glossy gold

Powered wheelchairs can sometimes be hard to store due to their bulky size or their large total mass, especially when you're travelling. Introducing Plego, a foldable lightweight powered wheelchair that can be folded easily. Even when folded, the wheelchair stays upright and can be manoeuvred not unlike a suitcase.

Whether you are just out and about for a short trip to the shops or exploring a city, Plego can be easily used to explore whilst extending your mobility. The 2 x 250W brushless geared motors are not only quiet and powerful when driving, they are very low maintenance and durable in use. In need of a little extra urban comfort? Plego has a variety of options such as extra storage or lights.

With a maximum speed of 6 km/h, Plego is a perfect choice to go on adventures with your friends and family. It has a comfortable driving speed to keep up whilst having a conversation comfortably during a walk. The lightweight Lithium-ion battery gives you a driving range of up to 21 km*. Perfect for a day out!

Built upon 65+ years of Belgian expertise and entirely crafted in Europe, this powered wheelchair embodies our commitment to the utmost standards of quality, safety, and comfort. Discover more about Plego's features and benefits to boost your life!

Forest 3 \ POWERED WHEELCHAIR

Forest 3

DRIVING SAFELY AND COMFORTABLY

Known for its innovative front axle system, the Forest 3 allows its user to drive safely and comfortably on various surfaces. With Forest 3, you'll overcome obstacles with ease in your daily life. A wheelchair made for adventures both indoors and out.

COMPACT FOR EASY MANEUVERING

The small and compact size of Forest 3 gives you a smooth turning radius. Perfect for indoor use or in social situations. Navigate small and narrow spaces or corridors easily with its small frame.

POWERED WHEELCHAIR WITH ENDLESS POSSIBILITIES

With more than 20 colour options, a large number of options, and adjustments…. Forest 3 can be personalised to any driver and their preferences. Although every Forest is different, the quality and durability remain constant. Every user has unique needs and the Forest 3 can easily adapt to meet yours.

Compact, durable, and high-performing, the Forest 3 is the ideal choice for those seeking a versatile powered wheelchair for both indoor and outdoor use. Designed with over 55 years of expertise, it seamlessly combines strength, comfort, and adaptability.

The front-wheel axle is a key feature, ensuring all four wheels maintain constant contact with the ground while providing stability and a smooth ride. For added control, the optional V-Stab technology helps the user stay on course over rough terrain or obstacles without the need for constant steering adjustments.

Comfort is essential for everyday use, and the Forest 3 delivers with its pre-shaped backrest and customisable options, offering a tailored experience to meet individual needs.

Features

Electric-powered inclination of the backrest and seat

Rotating axle to allow constant ground contact on all the wheels

Adjustable and foldable armrests with memory position

Sigma \ POWERED WHEELCHAIR

Sigma

UNIQUE TRIPLE AXLE SYSTEM

The SIGMA is equipped with a triple axel system (1 on each side + 1 at the rear). This allows it to absorb all the irregularities of the ground and to remain perfectly stable, even for crossings up to 65 mm (depending on configuration). We have decided to call this unique technology "All-Tracks".

ULTRA-COMPACT, PERFECT FOR INDOOR USE

Thanks to its six wheels and its small compact size, Sigma has a small turning radius. The wheelchair turns easily without losing its compactness or using up too much space. Sigma is an excellent choice for indoor use in compact and narrow environments.

PERSONALISED TO YOU AND YOUR LIFESTYLE

With a large range of options, accessories, personalized adjustments and colours, Sigma is a fully personal powered wheelchair made to suit you and your lifestyle. Mix and match to find the perfect combination suitable for your daily activities, style choices or needs. Sigma is a personalized chair, with an evolving approach.

The batteries of the Turios can be be transported by plane.

***SCAN the QR code** and enjoy the Turios movie.*

Turios is the most compact powered wheelchair in our range. The modern-looking chair is entirely adjustable to your preferences and needs. With a large range of colors and options available, you can configure and create a Turios completely suited to you.

Thanks to its small size, Turios maneuvers easily when used in indoor or narrow spaces. Public transport, using an elevator, or moving around in the comfort of your own home, this powered wheelchair conquers it all. Driving outdoors also poses no issue. Adapted to conquer larger obstacles with its large rear wheels, it remains stable even when driving over thresholds.

Adapt your positioning all day long or throughout your use to relieve pressure points or to find the most comfortable position for you. The electric-powered backrest allows for easy changes with minor effort and are included in all versions of Turios.

Bayo

THERAPEUTIC INDOOR SEAT

upholstery orange grey

C5 black frame

- Cosy and comforting upholstered seat
- Easy to maneuver with 4 swivel wheels
- Removable table for playtime or meal time
- Adjustable height without any tools
- Supports an excellent posture throughout the day

Reading, learning, communication and fun is what the BAYO seat is all about. It has become irreplaceable in the daily work with children as it offers optimal posture and stabilization.

The seat offers an exceptional stabilization of the pelvis. BAYO provides excellent comfort to the children. It is not possible to maintain a correct posture of the child without offering him a maximum seating comfort. Discomfort always stimulates attempts to change the seating position. The upholstery is made of ALCALA material. It is soft, nice to the touch, breathable, resistant to pilling, fireproof, easy washable, waterproof, very durable, imitating natural skin and eco-friendly material.

Inovys JUNIOR

HIGH COMFORT KIDS WHEELCHAIR

C4 red | C5 black | C53 orange | C76 white | C79 blue | C85 green

Thanks to years of experience in care wheelchairs, we accommodate to the youngest users and the caregivers. The design of Inovys Junior is expertly thought out to suit individual needs. It brings comfort, versatility, with endless possibilities, on top of Junior friendly design.

For short or long term usage, postural management throughout the day is a must for our users. Either for pressure relief, blood circulation, or just for comfort. You can easily adjust the tilting system to suit your needs.

Gas spring tilting & inclination possibilities for more precision and more comfort for the Junior and caregiver. Adjustment and configuration do not need to be set exclusively when comes the ordering process. During the day, the use, or with user growth, adjustment possibilities are a must to fit updated needs and to keep providing comfort. Inovys Junior version offers comfort pre-shaped seat and backrest cushions, available in many versions.
Not only does the chair allow to vary position & configuration. You can also configure and order an Inovys Junior that fits the users' needs best, thanks to the wide range of options and accessories.

Discover our range of comfort chairs and our shell chairs. Intended for individuals or communities, our chairs are designed to adapt perfectly to the users and their pathologies in order to bring them maximum comfort.

Our chairs are designed for both our users and their carers. We invest in improving the daily life and comfort of both. Our designs are comfortable and easy to use with a perfect balance in mind.

Inovys II Evo

MAXIMUM COMFORT

With its preshaped seat and backrest, comfortable leg rests and fully adjustable headrest, Inovys II Evo has been designed to provide maximum comfort to its user. The well-designed chair can be adapted to support individual needs.

MANUAL OR ELECTRIC TILT

Inovys II Evo is available in 2 versions: the classic version with seat and backrest tilt with assistance cylinders (ideal for a care giver) or the Inovys II-E Evo with an electric seat and backrest tilting system operated by either carer or user.

PERSONALISED CONFIGURATION

With a wide range of adjustment and accessory options Inovys II can be easily adapted to each users unique needs.

Inovys II Evo

COMFORT WHEELCHAIR

C89 copper

- Headrest adjustable in inclination, height, and depth
- Removable and adjustable (height and width) armrests
- Adjustable leg rests
- Seat cushion with soft foam
- Modern and new updated colors

The Inovys II Evo is a highly adjustable and comfortable care wheelchair, designed to meet a wide range of user needs. It features a backrest that reclines from 0° to 45° and a seat inclination of 0° to 21°, supported by gas struts for smooth adjustments.

With its pre-formed seat and back cushions, the Inovys II Evo offers exceptional comfort. The adjustable headrest, backrest height, leg supports, and leg rests ensure a tailored fit for users of almost any body type. A variety of accessories and customisation options provide even greater adaptability to suit individual requirements. Full details of available options can be found on the next page.

Also available in MAXI COMFORT version:
Equipped with a L58C comfort headrest adjustable in width and rotation and a BZ8C comfort leg rest for ultimate comfort.

INOVYS II E Evo

POWERED
COMFORT
WHEELCHAIR

C89
copper

- Seat cushion with semi-memory foam
- Adjustable headrest in depth and height
- Easy-to-use controller for user and attendant
- Removable and adjustable armrests (height and depth)
- Leg rests adjustable in height and positioning

Inovys II-E Evo is a comfort wheelchair with many adjustments included. The backrest can recline from 0° up to 54° whilst the seat can recline from 0° up to 21°. These inclinations are easy to adjust since the Inovys II E has a powered system.

Inovys II-E Evo has the possibility to recline around its epicentre, meaning that the patient can change position throughout the day or use it without tugging on the skin. Position changes are beneficial for blood pressure, blood circulation and general comfort.

Features

Optional anti-decubitus cushion

Easy-to-use controller

Adjustable headrest (height and depth) with lateral supports

Comfortable removable armrests (adjustable in height, depth, and width)

INOVYS II L70

GRANULATED SEATING SYSTEM

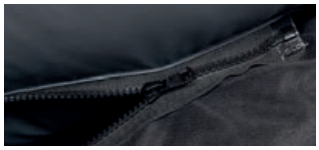

- All cushions are filled with resilient polystyrene granules that provide perfect support for the body and connect to the its contours.
- By adding or reducing the granules, the pressure on body contours can be increased or decreased.
- Due to the various adjustment options the wheelchair can be optimally adjusted.
- The comfort arms provide a secure and pleasant feeling that allows the user to completely relax.

VERMEIREN created the L70 positioning system in combination with the existing Inovys II wheelchair. For people who are bound to a passive sitting position, the Inovys L70 offers ideal seating comfort. The polystyrene-filled cushions in the back, seat, and leg area ensure pressure distribution and follow the contours of the body.

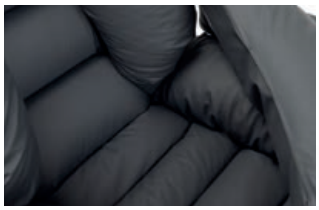

The Inovys II L70 is equipped with a fully adjustable headrest both in height and in angle and this without additional tools. Optionally, an L58G can also be mounted that automatically assumes any desired shape. A range of options means that the Inovys II L70 can be fully adapted to the needs and wishes of almost every user.

Individual adjustments are perfectly possible due to the adjustability of the angle of the foot section, the leg section, the seat section and the inclination of the back section. The drum brakes for the attendant and additional parking brakes ensure that the user can sit in the chair in complete safety.

Easy removal of the compartments by means of a zipper

Each compartment features bead-filled cushions that provide optimum body & contour support.

An optional washable cover in gray terry cloth is available and thus ensures more hygiene during daily use of the Inovys II L70.

grey

PATENT PENDING
Patent Pending Innovation

- Fast assembly and easy-to-install
- Solid metal frame
- Tool free disassembly with the two heaviest components weighing 18 and 16 kg
- TFB - Trolley Free Bed transport and bed all in one

Izyco is a toolfree bed made for renting market based on our Illico concept but with a patented trolley system that allows to transport the bed from one user to another without any extra separate trolley to move it.
The lower frame is designed in such a way that it serves as a trolley. This quite unique feature saves up space and time.

Electrical height adjustment: Mattress support adjustable from 298 mm to 828 mm
Enhanced comfort: Multiple adjustment options allow for personalized positioning
Safety: Lockable handset and side-rails reduce the risk of accidents
Ease of use: Electric controls simplify adjustments for both patients and caregivers
Quick setup: Tool-free (dis)assembly saves time and effort.
Mobility: Lockable wheels facilitate movement and secure placement
Aesthetic appeal: Wooden components offer a homely appearance, blending in with most interiors

Single person assembly thanks to the unique and simple to use folding system.

Kuarz \ OUTDOOR SCOOTER

Kuarz

DESIGNED WITH PRECISION

Our scooters are born from precision and pride, designed and built entirely in our own factories. Every element is thoughtfully crafted - no detail too small to matter. From the smooth feel of the steering column to the brightness of the LED lights, from the comfort of the adjustable chair to the quality of every nut and bolt, everything is scrutinised to perfection.

TECHNIQUE IN DEPTH

When it comes to scooters , the technical details aren't just numbers, they're the keys to freedom on four wheels. The width and length decide whether you glide gracefully through doorways or have to do a 2-point turn in the hallway. These specifications make sure your ride is safe, comfy, and joyfully yours.

CUSTOMIZE YOUR SCOOTER

Options are what turn a scooter from "just transport" into your scooter. Mirrors, rearview cameras, and rain covers aren't just accessories, they're little touches that make every ride smoother, safer, and more enjoyable. A dust cover keeps it looking sharp, while a rollator holder means your mobility always comes with you.

Options from left to right: MOVO rain/sun protection, set of mirrors, slick or studded tyres, colored hubcap matching your scooter color, topcase at the back, shopping basket at the front, storage protection cover, rearview camera

MOVO, a canopy for mobility scooters. REDESIGNED.

No matter the weather, the **Movo canopy** protects you first of all from the sun, but also from all weather conditions. Combining protective fabric against the rain, windshield and sun visor, it also protects against cold and wind. Easy to assemble, easy to install, and of impeccable design quality, the Movo canopy protects you from the sun, rain, cold and wind, while maintaining optimal ventilation in the cabin

Maximize the use of your vehicle

A much longer season
Get your vehicle out earlier in the spring, and extend your mobility scooter season, thanks to its protection against cold and wind.
Double your annual outings Increase your number of annual outings in uncertain weather. Don't be afraid of getting caught in the rain far away from home thanks to the retractable canopy, which can be adapted according to the weather.

A canopy that turns into a cabin in an instant

Thanks to its retractable technology, it does not need to be lowered at all times. You can choose the position that suits you, depending on the weather. You therefore have the option: canopy and cabin option with the same product.

Super-fast installation
You can install or remove the Movo canopy in less than 10 seconds. It's ultra-quick.

Easy to assemble
A detailed assembly manual and an accurate assembly video are available on our website, so you will be able to assemble the canopy in less than 15 minutes. Once assembled, the installation can be completed in less than 10 seconds.

Compact design
The width of the Movo canopy is 74 cm, which allows it to fit through all openings, even small interior doors.

Ultralight
With a total weight of 8,7 kg (19 lbs), the Movo canopy can be installed easily by one person.

09 \ TRICYCLES

TRICYCLES

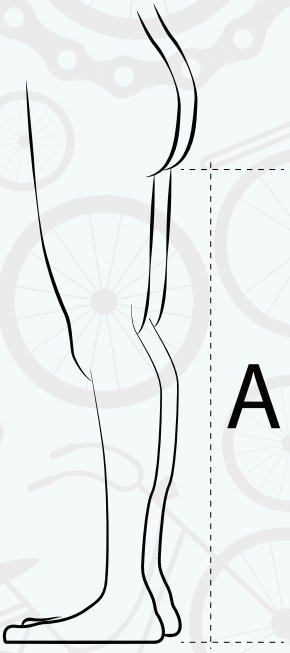

How to select my tricycle?	161
2202 Safari / Aqua	162
2215 Sporty / Happy	160
2217 Freedom black / white (E)	162
2219 Lagoon / Vintage (E)	163
Options	167

VERMEIREN is known to be one of the most reputable manufacturers of tricycles. Our products have been recently redesigned and will be perfectly adapted to all ages, all sizes and all pathologies. We also have a very large choice of options to further enhance your tricycle.

How do I choose my tricycle?

The choice of the size of a tricycle is determined by the Total inside leg length (A) - (total distance, straight leg, from the folds of the groin to the heel). You must then compare this figure to the measurements ground-saddle and saddle pedal below.

2202	2215	2217	2219
Distance ground-saddle **45,5 to 57 cm**	Distance ground-saddle **61 to 76 cm**	Distance ground-saddle **70,9 to 95 cm**	Distance ground-saddle **78,9 to 103 cm**
Distance saddle-pedal **34,5 to 47 cm**	Distance saddle-pedal **48 to 65 cm**	Distance saddle-pedal **58,6 to 82,7 cm**	Distance saddle-pedal **64 to 88 cm**
3 years and above	**8 years and above**	**14 years and above**	**adults**
models : **Aqua & Safari**	models : **Happy & Sporty**	models : **Freedom & e-Tricycle**	models : **Lagoon Vintage & e-Tricycle**

What's the difference between a fixed -gear of a freewheel?

FIXE FIXED-GEAR tricycles have a single cog and chainring. The rear cog is bolted in place on the hub of the rear wheel. It cannot rotate independently from the wheel. In other words, there is no freewheel mechanism.

SINGLE-SPEED bikes are equipped with a freewheel mechanism. This allows the rear cog to rotate in one direction relative to the rear wheel but not the other. The cog can freely spin backward or stay in place while the rear wheel rolls forward.

FIXED-GEAR

*You can cycle forward **AND** backward*

FREEWHEEL OR SINGLE-SPEED

*You can only cycle **FORWARDS***

2202 Safari

TRICYCLE - AGE 3 YEARS AND ABOVE

Tricycle 2202 for children with 12" tires in the color variant yellow/black (Safari) or blue/white (Aqua) with a low frame. Thanks to its extensive range of accessories, this tricycle is a reliable partner for therapeutic use.

Mia

RAISED TOILET SEAT

This comfortable toilet seat raiser (available in different heights) is compatible with most toilets. Installation can be done without extra tools. There is also an optional rubber cover available for added comfort.

white

Total width	365 mm
Total length	405 mm
Total height	100 mm / 150 mm
Weight	1,3 kg / 1,45 kg
Maximum user weight	225 kg
Additional information	CE

Tina

RAISED TOILET SEAT WITH ARMRESTS

Tina is ergonomically designed to provide hygienic and comfortable visits to the bathroom. This toilet seat fits most toilets. The armrests and the added height provide extra stability when getting up.

white

Total width	510 mm
Total length	510 mm
Seat height	340 - 440 mm
Weight	2,8 kg
Maximum user weight	150 kg
Additional information	CE

260

QUAD CANE

Fitted with four non-slip cane tips, the 260 quad cane can stand on its own completely independently. The cane provides more stability than a regular cane. Adjust its height to adapt to your length and needs.

C29 grey

Total width	224 mm
Total length	335 mm
Total height	673 - 870 mm
Weight	1,4 kg
Maximum user weight	100 kg
Additional information	CE

264

QUAD CANE

Just like the 260 quad cane, the 264 cane provides extra stability to its user with the added bonus of a swan-neck-shaped handle. The swanlike form allows for even better weight distribution.

C29 grey

Total width	232 mm
Total length	383 mm
Total height	805 - 953 mm
Weight	1,5 kg
Maximum user weight	100 kg
Additional information	CE

640

TOILET AID

640 is suitable as an assistive product for elderly people or people during recovery. The aid provides extra support, making it easier to sit down and get up. It is also height adjustable as to fit your personal preferences.

C29
grey

Total width	590 mm
Total length	420 mm
Total height	645 - 755 mm
Weight	4,2 kg
Maximum user weight	120 kg
Additional information	CE

Izzie

BATHROOM HANDLES

Bathroom handles are available in different lengths from 300 mm to 800 mm. Ideal as supports for additional safety in wet environments.

white

Total length	300 - 400 - 450 - 600 - 800 mm
Distance between bar and wall	40 mm
Maximum load	130 kg
Additional information	CE

Kim

PEDALO WITH DIGITAL DISPLAY

Staying active at home is made easy with this pedalo. The foldable design allows for compact storage. Track your progress with the included calorie counter.

blue

Total width	395 mm
Total length	500 mm
Disassembled height	160 mm
Weight	2,3 kg
Maximum load	50 kg
Additional information	CE
